Training

DTA offers customised programmes to meet specific requirements of the clients in industry and public sectors, and develop their digital insight into the real business world.

Three training tracks are designed for senior managers and professionals, who are willing to boost relevant digital leadership skills within a specific company:

- Digital skills and technology track
- Digital management and innovation track
- Digital transformation and leadership track

Business Technology Leadership

Programme overview:

This programme incorporates advanced resources to help you develop a comprehensive understanding of business strategy and technology architecture aligned with business development.

Through interactive teaching and practical case studies, you will gain an insight into enterprise strategy, business and technology architecture, and company resource management (such as human resources, finance, marketing and data).

Outcome:

As a result of taking this programme you will obtain:

Knowledge:

Exposure to leading edge ideas from the Henley faculty and industry experts that relate to the leadership, entrepreneurship, innovation, transformation, and organisational challenges for corporations in today's fast changing market environment.

Mindset and capability:

Support senior leaders to generate innovative outcomes to respond to the challenge in digital transformation, and to lead change within your organisation.

for senior digital leaders

CASE STUDY

du UAE Leadership for Digital Transformation programme

In June 2022, we collaborated with Huawei and successfully delivered a five-day programme, Leadership for Digital Transformation, to a delegation of senior members from du from UAE. The intensive executive programme focused on improving the understanding and knowledge of 5G networking technologies, while developing digital leadership competencies. Through in-class discussions, course attendants gained an important insight into digital transformation.

This programme is very useful by complying theories with real life cases, which I can relate to and also bring my own experiences to the table. Through sharing ideas with professors and fellows, my understanding of digital leadership was enriched.

says Dr Alia Al Serkal,
Head of People Learning & Growth, du

Training for future talents

Three training tracks are designed for university students or industry experts, who want to excel in the following areas:

- Digital business operation
- Business systems and processes
- University education innovation

Digital Transformation Leadership

Programme overview:

This programme aims to give you the knowledge and leadership skills required to build a foundation in the business strategy, planning and execution required for a business to execute a successful digital transformation. It provides future talents with practical knowledge and tools that assist in setting an agenda and defining a roadmap focused on strategy, e-commerce, marketing and finance when planning their Digital Transformation journey.

Shared Contents	Digital Management and Leadership		Business Ethics	Open Contents Tailored to customers' learning needs. Co-developed with customers
Contents by directions	Business & Management Track	Finance & Management	E-commerce & Management	
	Business Development	Financial Markets	E-Business

Successful Case

Outcome:

By the end of this programme you will be able to:

- Plan and build a digital transformation strategy
- Access world-class expertise from global business eco-systems
- Draw on professional knowledge from industry experts and leading researchers from Henley Business School

Chongqing University World Young Leadership Camp

In August 2019, we collaborated with Chongqing University and launched our second "World Young Leadership Camp". To develop students' leadership skills, this programme included courses in administration management, international business, HR management, marketing and digital transformation. Throughout this programme, students can develop their leadership as well as critical thinking skills through a series of practical seminars and case studies.

The background of the slide is a scenic landscape. In the foreground, there are rolling hills covered in golden-brown grass. In the middle ground, there is a dense line of green trees. In the background, more hills are visible under a sky that transitions from a deep blue at the top to a warm orange and yellow near the horizon, suggesting a sunset or sunrise.

Digital Skills and Technology Courses

Content:

These courses focus on developing digital skills and technology for industry professionals and university students. Course design is aligned with the latest trend of technology development and is credited by the leading ICT firms and communities.

Microsoft Excel - skills and solutions

Microsoft Excel is an essential office tool which has become synonymous with the modern world of work. Along with Word and Power Point, it is often part of the job requirement in almost all roles. Competency on Microsoft Excel can be one of the requirements in job applications and when transferring from internships to full-time roles. Proficiency in Excel is undoubtedly an important pillar in your career.

After completing the course, you will be able to:

- Use basic operations of Excel software, including layout, interface and worksheet structure

- Master the input management functions, including cell properties
- Develop your understanding and skills of Excel advanced functions for data analysis and visualisation
- Complete a capstone project with the obtained Excel skills

Successfully finishing the course will result in a Certificate of Completion from Henley Business School

If you are interested in signing up to the course, or have any questions, please send your enquiries to:

 DTA@henley.ac.uk and q.li6@henley.ac.uk

Python Programming

Python is a general-purpose programming language that is becoming more popular for data science. Companies worldwide are using Python to manage, integrate and harvest data to gain business insights and leverage their competitive edge. Python programming skills are an important asset in both job seeking and career development, and can help a candidate stand out.

We are offering a two-day intensive training course on Python programming, to bring you from either from a novice or intermediate user, to someone capable of programming a working solution in Python. Successful completion of the course will result in a Certificate of Completion from Henley Business School.

After completing the course, you will be able to:

- Understand basic syntax of the Python programme
- Master the skills of importing and implementing Python library packages for file management and data analysis
- Develop good understanding and skills in using Python automation to manage data from multiple office files, such as Excel files integration, split, and query

Successfully finishing the course will result in a Certificate of Completion from Henley Business School

If you are interested in signing up to the course, or have any questions, please send your enquiries to:

Huawei ICT Academy

Huawei ICT Academy at University of Reading (HICTA) is an executive training and research centre supported by Henley Business School and Huawei. It was established in 2015 and it is the first Huawei ICT Academy in the UK. From 2021, we have been officially authorised as a Huawei ICT Academy Support Centre (ASC).

The academy provides a series of Huawei-accredited training programmes to help you build a foundation to develop your skills and abilities further and become an expert in in your field.

Huawei HCIA Certification

- HCIA- Cloud Computing
- HCIA- Big Data
- HCIA- Artificial Intelligence

Working with a world leading company such as Huawei gives us an opportunity to offer students qualification training, which perfectly combine technical skills with academic knowledge.

Professor Keiichi Nakata

Director of Informatics Research Centre, Henley Business School

Huawei-certified training courses

HCIA - Cloud Computing

We will help build a solid grounding for you to gain a comprehensive understanding of cloud computing and its complexities.

Course includes:

- Visualisation technology
- Visualisation of Computing Resources
- Visualisation of Network Resources
- Future Trends of Cloud Computing

HCIA - AI

Artificial intelligence (AI) is evolving rapidly and is used in almost every industry.

Our programme will introduce you to TensorFlow, the basics of mathematical modelling, and Python. Course includes:

- Python programming basics
- TensorFlow overview
- Overview of deep learning

HCIA - Big Data

Big data plays a huge role in the ICT industry and studying with us will allow you to stay at the forefront of developments in this sector. Course includes:

- Developmental trends within the big data industry
- Foundation principles of essential components of big data
- Huawei Fusion Insight HD Solution: architecture, function and successful application.

Programme structure

Most of the programmes listed are extra-curricular, so will be scheduled on weekends during term time and on weekdays outside of term. Each course comprises of 20 hours of lectures, ending with a 1.5 hour certificate examination.

We can digitise the physical world.

Lida Yan, Director of the Board and President of Enterprise, Huawei .

Important information

This document was produced in September 2022 and is aimed at individuals and organisations interested in applying for a place or places at the University of Reading ("the University") to a Henley Business School (Henley) Apprenticeship Higher or Degree programme in 2022.

This document describes in outline the programmes and services offered by Henley. Henley makes every effort to ensure that the information provided in this document is accurate and up to date at the time of going to press (May 2022). However, it may be necessary for Henley to make some changes to the information presented in this document following publication. These reasons may include, by way of example, operational and/or academic reasons, which reflect changes in practice or theory in an academic subject as a result of emerging research, if an accrediting body requires certain changes, or if the UK Government introduces legislation and/or public health measures that require us to make changes to any of the published information. We have set out in this document information regarding typical programme content at the date of publication, but this is not intended to be construed and/or relied upon as a definitive list of the topics that will be covered. Programme content may change due to developments in the curriculum, the research interests of staff, or the relocation of staff.

To make an informed and up-to-date decision, please visit www.henley.ac.uk or contact us at apprenticeships@henley.ac.uk for the latest information before applying to study.
